

## **I&E ODKS Outdoor Weatherized Kiosks:**

### **The Ultimate Self-Service Solution for the Trucking and Yard Management Industry**

#### **Experience Unparalleled Versatility and Durability**

When managing a busy yard or coordinating truck fleets, time is money, and efficiency is key. If you're looking for a self-service outdoor kiosk solution that can withstand the harshest outdoor conditions, while providing a seamless experience for your team, look no further. I&E's ODKS Series of **Outdoor Weatherized Kiosks (ODKS)** are engineered to meet the demands of rugged environments like trucking and yard management, ensuring **reliable performance** in any weather.

#### **Weatherproof and Tamper-Resistant Design**

Our ODKs are built to endure the elements. Sealed and **weatherproof**, these kiosks protect critical components from rain, snow, sleet, and extreme temperatures. Their **rugged construction** and **vandal-resistant tempered glass** ensure consistent, tamper-proof operation—even in the busiest, high-traffic environments like truck yards, terminals, and distribution centers.

#### **Wide Range of LCD Sizes and Multi-Touch Capabilities**

No two operations are the same, and that's why our ODKs come in a range of **LCD sizes**, giving you the flexibility to choose the right kiosk for your needs. Whether you're managing logistics or providing quick, on-the-go check-ins for drivers, we've got you covered. The kiosks feature **10-point multi-touch capabilities**, enabling intuitive interaction—even with gloved hands or in wet conditions, ensuring your team can easily access information when needed.

#### **Optimized Display for Outdoor Visibility**

Outdoor environments present unique challenges, especially when it comes to screen visibility. Our kiosks feature an **anti-reflective coating** and **IR/UV blocking film** to protect the display and enhance **outdoor readability**. This ensures crisp, clear visibility even in bright sunlight, so your team can interact with the kiosk and access critical information without any frustration.

#### **Built for Extreme Temperatures**

Truck yards and outdoor facilities face extreme weather conditions, from **scorching heat** to **freezing cold**. Our ODKs are tested to handle temperatures ranging from **-30°C to 50+°C** (-22°F to 122°F), ensuring reliable performance no matter where your operation is located. These kiosks are designed to function seamlessly in any climate, giving you peace of mind and confidence.

#### **Solid State Thermal Cooling**

Outdoor environments can get dirty and dusty, but we've got a solution to keep your ODK running smoothly. Our **solid-state thermal cooling** system ensures the kiosk stays cool and clean with sealed airflow, eliminating the need for air filters. This minimizes maintenance and helps extend the life of your kiosk, making it the perfect solution for industrial and yard management settings.

### **Secure and Customizable for Your Needs**

Security is a top priority, and our ODKs come with **locks** and a design that actively **deters tampering** and vandalism. Plus, you can customize the kiosk with a wide range of **peripherals** such as **Barcode / QR Code Readers ( w/parsing software to read drivers licenses)**, **Relay Boards**, **Receipt Printers**, **RFID Readers**, and more, allowing you to tailor your solution to your specific operational needs. Whether it's truck access control, ticketing, or fleet tracking, we can help you get the most out of your kiosk.

### **Durable and Appealing Construction**

Durability doesn't mean sacrificing appearance. Our ODKs feature a **corrosion-resistant zinc primer powder coat** finish over a polyester undercoat, maintaining their aesthetic integrity despite exposure to the elements. The result is a kiosk that not only performs but also maintains a professional look at all times.

### **Choose the Perfect Stand for Your Site**

Whether you need a **walk-up** or **drive-up** kiosk, our heavy-duty stands are available in both **single post** and **dual post** configurations for MAC Trucks, offering flexible installation options tailored to your needs. The ODKs are perfect for applications such as **truck access control**, **yard management**, and industrial logistics, allowing for seamless integration into your operation.

### **I&E: Your Outdoor Kiosk Solution Partner**

At I&E, we specialize in providing innovative and reliable self-service kiosks for industries like trucking and yard management. Our Outdoor Weatherized Kiosks empower your team with self-service capabilities, making operations more efficient, secure, and user-friendly—no matter the weather.
